Analysis of Query & Answer Systems for Meeting Minutes

AI Research & Development

Master Thesis Project

OCTOBER 2019

Proposers and Contact Info (Academic and Industrial Mentoring)

- Prof. Eneko Agirre (IXA Team, EHU/UPV): e.agirre@ehu.es

Project Description and Goals

Nowadays, it is possible to automatically have a Meeting Minutes by audio-recording a meeting and, later on, using Speech To Text (STT) techniques to translate the recording to a text document. Moreover, NLP techniques can be employed to summarize these Meeting Minutes in order to provide a potential interested reader with the most significant information discussed on the meeting and, probably, the actions to follow. However, the amount of information about the meeting available to the potential reader is fixed by the quality and length of the summary. **The aim of this project is to allow a potential interested user to find any information of interest in the Meeting Minutes by directly asking about it.**

Question Answering (Q&A) is a computer science discipline within the fields of information retrieval and natural language processing, which focuses on building systems that automatically answer questions posed by humans in a natural language. Q&A Systems can be defined exploiting Knowledge Databases or by means of Information Retrieval (IR), that is, finding text segments in a document that are relevant for the posed question. Recently, state-of-the-art Neural Language Models have been applied to develop IR-based Q&A Systems. **The project consists of exploring Neural Language Models for IR-based Q&A systems to answer any potential query about Meeting Minutes documents.**

Working Plan & Expected Results

1. Exploratory analysis of public benchmark Meeting Minutes datasets
2. Experimental design of neural language models for IR-based Q&A Systems
3. Report

Requirements

Basic knowledge of:

- NLP
- R / Python

Interest on:

- Neural Language Models
- Question Answering Systems

Benefits and Practical Information

- Funding: 650€ / Month
- Duration: 3 – 6 Months
- Location: Aula SHERPA, Fac. Informática San Sebastián

Sherpa Europe, S.L. (Sherpa) accepts no liability for the content of this document, or for the consequences of any actions taken on the basis of the information provided. This document is intended to provide preliminary guidance in anticipation of further discussion and has not been prepared with the level of due diligence and analysis that would be needed to constitute a commitment of Sherpa. Anyone who receives this document are cautioned to consider that its contents are unaudited and that it may contain inaccurate, incomplete or summarized information, which may be change without notice. This document is confidential and its contents may not be totally or partially disclosed or reproduced, without the prior written consent of Sherpa. By allowing you access to the aforementioned document we shall have no liability, duty or obligation of any kind to you.
